Objektbeschreibung

On the approximately 618 sqm building plot in top location of Ses Salines you can make your Mallorca dream come true.

The plot is located in a quiet side street not far from the dream beach "Es Trenc", which is considered one of the best beaches in Spain.

It is suitable due to the attractive location both as an investment object, as well as for the realization of your individual residential dream. Here it is left to your imagination, whether you create a traditional, two-story townhouse with pool, or luxurious apartments for rent.

All desirable utilities, such as electricity and water, are available in the street and the connection is accordingly hassle-free. During 2023, the sidewalks will be completely renewed, as well as the water and electricity supply.

Self-sufficiency through the construction of a well and the use of solar technology is also common in the country. All options for closing the gap in the building are open and we will be happy to advise you in this regard.

Numerous localities are within walking distance in less than 5min, like a numerous selection of restaurants, supermarkets, pharmacies and several bus stops. The local area offers everything you could wish for and much more. Also for example a gym, vet and playground are only a few minutes away. The property is located very close to the old town and the center, where every Thursday there is a street market in Mallorcan style.

It is worth noting that this village is typical for its salt mines, hence its name, where every year endless quantities of salt are extracted for consumption.

Our construction professionals will be happy to advise you and work at fixed prices. Make an appointment now with your personal contact.

Features

Energy certificates are also mandatory for real estate in Spain, but are often not issued until shortly before the sale due to their validity. The value stated in the exposé is therefore given at the lowest level if it is not available and can improve significantly after preparation.

So-called "townhouses" offer decisive advantages:

- Central location and "living in a community"
- Restaurants and cafés within walking distance
- Connection to utilities (water, electricity, sewage, Internet)
- Protection against burglary due to central location
- Low maintenance compared to a finca with land plot

If you want to avoid the risks of buying real estate in Mallorca as an investment, let our real estate professionals advise you.

home4you mediates, plans and manages mainly inexpensive real estate with historical character, which

shine again to new splendor by renovation.

For this, home4you has specialized in inexpensive existing properties which, with renovation according to the latest standards, become personal dream properties, but are still well below the usual market value and this is exactly where your profit lies.

You save cash, if you make yourselves only a few thoughts. Because where otherwise real estate companies make their profits lies your financial advantage. And by the way, you can design almost everything in a way that would not be possible later in a finished property.

If you wish, the home4you team will be your contact during the construction phase and afterwards, e.g. for tenant processing, administration and accounting.

Of course we take care of everything around your dream home. Construction planning by our own architect, cost estimation and advice on energy saving, alternative energies and building materials. Construction execution by our own teams up to the final building inspection.

Minor changes included.

Location

Ses Salines is a municipality in the southeast of Mallorca and is known for the dream beach "Es Trenc", this is only about 4 km away and thus easily accessible in 5 minutes. The name of the municipality is derived from the large salt mines that are still used for salt production.

The entire eastern part of the island is especially known for its beautiful beaches and bathing bays with well-kept sandy beaches. These are awarded with the European Blue Flag for good bathing water. The beautiful natural beaches with crystal clear water in the southeast of the island are also easily accessible.

From the airport to Ses Salines it is about 50 km and due to the freeway existing since 2020 to Campos and the then very well developed roads only 30 to 35 minutes driving time.

The clearly structured village belongs historically to the wealthy communities of the island and therefore also has beautiful buildings, whose restoration often brings true treasures to light, including natural stone walls, round arches or dreamlike cool courtyards, which not infrequently offer space for a pool.

It consists mainly of typical Mallorcan townhouses or villas with corresponding plots of land. Most of the houses have small, mostly refreshingly cool inner courtyards (patio), or even small gardens. The houses are mostly inhabited year-round, but are also used as vacation homes. This makes the municipality a pleasant place to stay at any time of the year and always lively, but without being overrun with tourists.

In Ses Salines you will find all year round open beside various restaurants and bars all things of the daily need, supermarkets, banks, hairdressers, cosmetics, green market, massages and post office, all are well within walking distance.

The weekly market in Ses Salines completes the offer.

Large supermarket chains are located in the neighboring village of Campos or Santany.
